Penetration Testing • Jenkins • AWS • ESXi • Networking • pfSense • Python • Shell Scripting • Kali Linux • Team Leadership

EXPERIENCE

DeepSeas

Remote

Senior Penetration Tester – Offensive Security

July 2025 – present

- Deliver quality network and web application penetration tests, detailed written reports and post-test debrief calls.
- Service lead and owner of team infrastructure for operational execution of 14+ security consultants and cross-functional stakeholders from Vulnerability Management and GRC teams.
- Maintain, monitor, and troubleshoot recurring Kali Linux builds and related workflows orchestrated with Jenkins.
- Manage infrastructure across DigitalOcean and ESXi virtualization platforms and public AWS S3 bucket.
- Develop shell and Python tooling to automate team infrastructure and deployment tasks.
- Administer cloud hosted pfSense OpenVPN server and provide frontline support to internal stakeholders and customers with complex network environments.

Operations Manager – Control & Validation

July 2023 – July 2025

- Led services team of 8 testers to deliver 200+ penetration tests annually, including red team engagements and web application, API, network, wireless, social engineering and physical penetration testing services.
- Actively navigated post-acquisition logistics in coordination with multiple departments and stakeholders to ensure consistent delivery of consulting services.

RedTeam Security

Remote

Vice President of Operations

May 2023 – July 2023

- Oversaw daily operations of a consulting services team of 6 penetration testers through the final stages of an acquisition by DeepSeas.
- Ongoing partnership with leads of Sales and Project Management teams to review customer requests, assess test complexity and identify staff requirements to deliver penetration tests and security assessments.

Manager of Operations

December 2021 – May 2023

- Managed daily execution and needs of security operations team, reporting directly to Vice President of Operations.
- Mentored a team of 9 security professionals on internal and external network penetration tests, Active Directory (AD) environments, and web application assessments, while shortening service delivery timelines and improving consistency of customer reports.
- Subject matter expert supporting sales department scoping calls to develop customer projects.

Security Consultant – Operations

August 2020 – December 2021

- Delivered web application, API, external and internal network, cloud and Active Directory penetration testing and vulnerability assessments to measure and improve customer security posture.
- Implemented monthly Jenkins builds of custom Kali Linux image, reclaiming up to 4 troubleshooting hours per cycle.

Rapid7

Austin, TX

Senior Security Analyst – Global Services

August 2016 – April 2019

- Conducted 30+ penetration tests annually for clients within a consulting services organization.
- Led engagements, kickoff calls and post-engagement debriefs with engineering and executive stakeholders.
- Mentored junior team members and evaluated emerging tools, techniques, and procedures.
- **Project Owner and Lead Engineer – Penetration Testing Kit**
 - Owned source code, build systems and cloud infrastructure for the PTK remote access solution.
 - Rearchitected and hardened Jenkins build pipelines to deliver build artifacts within 2 hours of initial request.

TipplingPoint

Austin, TX

Senior Security Analyst – Digital Vaccine Team

March 2011 – July 2016

- Developed regex-based detection signatures for a line of Intrusion Prevention System (IPS) appliances.
- Analyzed network behavior of exploits and structure of malicious tools to identify and block unwanted traffic.
- Supported lab environments used for exploit reproduction and analysis to develop vulnerability scanning modules.

EDUCATION

The University of Texas at San Antonio

Bachelor of Science (BS) in Computer Science

August 2010
